Prest-O-Lite Battery

A Current Bibliography

Canada's Busiest Thoroughfares Bear Eloquent Testimony to Prest-O-Lite's Efficiency

WHERE traffic runs smoothly, in a constant, uninterrupted stream, there you may always know that Prest-O-Lite is on the job.

The Prest-O-Lite storage battery has been adopted, as standard factory equipment, by three-fourths of Canada's motor car manufacturers because it has proved its superiority in every test of power, endurance, and performance.

All Prest-O-Lite Batteries are made to stand the strain, under all sorts of traffic and weather conditions. With a Prest-O-Lite Battery on your car, you are always sure of more power, quicker starts, brighter lights, and regular, expert attention and service.

Pro-O-Lite Battery users don't need to worry about the "insides" of their batteries. They don't have to know the first thing about "grids" or "electrodes" or "electrolyte"—that's the Service Doctor's business.

What they do know is that Prest-O-Lite is made in Canada by Canadians, and sold in over 400 cities and towns, by over 500 Canadian merchants, at a fair and reasonable Canadian-made selling price, based on actual Canadian manufacturing costs.

The Dominion-wide system of Prest-O-Lite Service Stations will relieve you of all your battery worries.

In the soft shadows and delicate tracings of a fine rug lies its call for admittance. The maintenance of these charms is an important function of The Hoover. Rapidly its electric sweeping reveals anew the colors dimmed by soot, and brushes straight any rug disarranged by heels. At the same time it beats out all destructive embedded grit, collects stubborn, clinging litter and thoroughly suction-cleans. Only The Hoover does all this. And it is the largest selling electric cleaner in the world.

Where Belts Meet Dampness!

Goodyear Extra Power Belt
Delivers Power and Lasts

Damp or wet belts usually slip more easily than dry belts.

Water and moisture form a thin film between pulley and belt.

Here "Extra Power" Belting especially displays its advantages.

Where there is water, moisture or steam—around the beasters in paper mills, for instance—Goodyear Extra Power delivers the power load just as under more favorable conditions.

Because Goodyear Belting has a rough, friction surface which bites through the film of water and clings to the pulley. Costly slipping is overcome.

Moisture rots belts, if it gets into them.

Goodyear Extra Power is rubber-sealed against moisture.

Not just enclosed in a rubber envelope.

The high-grade rubber in Extra Power is forced through and through the fabric, surrounding and protecting every strand, making the belt practically a solid unit.

That Goodyear Extra Power Belting is just as efficient and just as economical in damp or wet places as in other transmission uses, is proved by these satisfied users:

The Provincial Paper Mills, of Thessalon, get 16 months' service from Goodyear Extra Power on a Jordan Pump where they had been getting about one month's service. They also say: "In the room where our belts are located, the air is constantly damp. Here we have found Extra Power so superior that we use it exclusively."

Some other firms who will be glad to tell you of the satisfactory service of Goodyear Extra Power under damp conditions are:

Mitogami Pulp & Paper Co., Smooth Rock Falls, Ont.

Port Arthur Pulp & Paper Co., Port Arthur, Ont.

North-West Laundry Co., Winnipeg, Man.

Desautel Pulp Co., Chibougam, N.B.

Barbier Lumber Co., Belcourt, N.B.

Gloucester Lumbering & Trading Co.,

Belcourt, N.B.

If you use belting, it will pay you to hear about the Goodyear way of supplying them. It will cost you nothing to have a Goodyear man call and show you how to overcome your problems. Please, wire or write the nearest branch.

During the passenger en route a stop
was made at Atlantic recently where a man
who was away during the winter was
seen. This stop he intended to be
a long one—about 10 hours.
"Oh, I was in the railroad," said the
captain. "I am an engineer's mate.
The man I went to speak to was
an engineer. But he is not a railroad
engineer. He is a steamship engineer."

"I have no desire to be captured again," said the captain. "I can tell you what to do when you come to my anchorage port. I am leaving the harbor in a week, when the sea begins to rise."

THE
NEW McLAUGHLIN
LIGHT SIX

- a longer wheelbase
- an improved motor
- improved spring suspension
- superior finish and trim

added to all the good qualities of the previous McLaughlin Light Sixes, make the K-5-65 the best buy in its price class.

Powered with the famous McLaughlin 44 horse-power over-head valve motor. Owners report from 20 to 30 miles per gallon and from 8 to 12 thousand miles on tires.

that fine specimen," and Whigham would know just what I mean by *fine bone* here. It is. Or it would be. Whigham, too, would like the Marauder that comes in *overhauls*—*gosh*—the classic models would be to me. —On the Domes and 2 would have just one more to add to the collection.

most considerably. That you could not very well have been a member of the church in any way and wrote a prayer or a blessing if it were so, why do you go to church? It is necessary to have a knowledge shall it be on the part of the church or the individual? I think it is necessary to have a knowledge that could not have been a knowledge before baptismal if he has not been a Christian before baptismal, then pull me out.

unpublished in the original. In summary, the main point was that using the term "cancer" to describe a disease that was unlikely to be curable, and that was likely to shorten one's life, was misleading. This was not the only argument, though; it was the point that death from cancer was not the only way that people died, and that most of people's world was day-to-day existence in a struggle to stay healthy and to live as long as possible. The struggle, I think, was what defined the disease. The struggle was what gave it meaning, and it was enough for me to discern the great importance of this disease to the people I met. I think that the struggle of patients in their trying to live as long as possible, and as comfortably as possible, was the most important aspect of the disease, and I developed my own view of it as a struggle, as a never-ending battle, as a way of life, as a way of being.

卷之三

You Buy Economy When You Buy a National

WEIGHT is an important factor in motor truck economy. While we do not urge that you buy your truck *solely* on a weight basis it is essential that you give to it the utmost consideration.

The National is the ideal truck. It is not too bulky in proportion to loads. The National is designed with weight reduction in view. Its superiority is due to scientific balance of weight and structural accuracy. No one part is heavier than it ought to be. Advanced engineering demands it. Economy demands it.

Materials used are lighter but stronger than those used in other trucks of the same capacity. This

minimizes vibration, gasoline consumption and repair bills without sacrificing strength.

The National is a rugged, upstanding truck with ample reserve power for any emergency. Its dependability and economy is being proven daily. Ask for performance records—watch the truck in operation. Convince yourself.

Built in 5 models—1 ton, $1\frac{1}{2}$ ton, 2 ton, $3\frac{1}{2}$ ton and 6 ton tractor.

NATIONAL MOTOR TRUCKS

All Pittsburgh Was Amazed!

The NEW EDISON
"The Phonograph with a Soul"

CARNEGIE HALL, Pittsburgh, was packed to its seats on the night of September 30, 1911. The audience was made up of 2,000 of the city's most music-c狂。 That same night hear Marie Rappold and Marie Laurensi make a remarkable appearance with the New Edison's RE-CREATION of their voices. Read what the Pittsburgh newspapers say—see what happened. All Pittsburgh was amazed. There was no difference between the voice of the living artist and its RE-CREATION by the New Edison.

2,000 odd audience have heard voices from gone by forty different artists of international fame. Always the result has been a surprise for the New Edison.

The story of Edison's RE-CREATION of Marie Rappold on an unrecorded disc book. Listen and hear. Watch for it.

Miracle Songs Create Furore

Concert in Carnegie Music Hall Amazed Big Pittsburgh Audience

The word was coming. It was a fact. Marie Rappold and Marie Laurensi had come to Pittsburgh. And now, in Carnegie Hall, the city was packed to its seats to hear the voices of the two most famous singers in the world. The Pittsburgh Post-Gazette said: "The world's greatest voices are to be heard in Carnegie Hall this evening."

From the Pittsburgh Daily Record
Rappold and Laurensi
